BENTE 2-row

Advantages:

- Very good yield
- Excellent yield after grading > 2,5 mm
- High diseases resistance; Untreated yield: rel. 109% to french control varieties

Cultivation:

BENTE is a high yielding barley and a low input type with an ideal and regular protein content for the maltsters.

Short profile:

Version: 11.05.2020 / 1.00

Breeder: Nordsaat Saatzuchtges. mbH, Germany

BENTE 2-row

Plant development and vitality:

Ear emergence

Maturity

Yield structure:

Ears/m²

Grains/ear

TGW

Sowing:

Time of sowing

early until very late

Seed rate

normal conditions, normal time of sowing: 260-280

Straw:

Lodging resistance

Necking resistance

Plant growth regulators

below average, for example 0,2 I/ha Camposan in EC 37-47

Disease resistance:

Mildew

Net blotch

Rhynchosporium

Plant protection

Under high disease pressure a splittetd treatment in EC 32 + EC 49 is profitable

Quality:

Grading (> 2,2 mm)

Grading (> 2,5 mm)

Hectolitre weight

Raw protein content

Breeder: Nordsaat Saatzuchtges. mbH, Germany
